

Vision:

IWM aims at becoming a world-class institute of learning and research in the field of Water Modelling, Computational Hydraulics and Allied Sciences in enhancing the quality of planning and implementation activities in the relevant fields and providing solutions to water problem in holistic approach.

Mission:

IWM functions as a centre of excellence and research in the field of Water Modelling, Computational Hydraulics and allied Sciences, and provides services in this field on a cost recovery basis in enhancing the quality of planning and implementation
